

eMOTION™

A dynamic combination of lighting, printed graphics and motion.

Bring your graphics to life with rear projected LEDs in a self-contained reusable frame.

- Write with light to create the ultimate stimulating brand experience with custom-printed fabric and lighting effects.
- Create seamless grand format panels or embed eMotion into larger Moss Structures.
- Compact in footprint, eMotion™ framing is only 100mm thick.

- Proprietary lighting technology is lightweight, energy efficient and quick to install by our specialty installers.
- Tens of thousands of white, panel-based LEDs create the motion from your designed animation. RGB LEDs available upon request.
- Collaborate with us during the early phase of your project to develop the best size, graphic and animation for your vision.
- Our creative services, custom programming and installation included.
