

# FABRIC PRODUCT CARE

## HANDLING

Always handle fabric in a clean area with clean hands or gloves.

## REMOVING WRINKLES

Most wrinkles disappear within 24 hours of installation. A steamer can be used if needed. Do not iron.

## PACKING & STORING

Fold face inward and roll or loosely fold. Store in a cool, dry area 40° - 80° F. Ensure fabric is clean and dry before packing. Fabrics shipped rolled should be stored rolled.

## STAIN CARE

Many stains can be removed if treated promptly via prescribed method below. **Moss Stretch Glow** should not be spot-cleaned. For care on a specific textile, please call Moss.

STAIN CARE	CLEANER	RECOMMENDATION
Dirt	Mr. Clean® Magic Eraser	Use the eraser without water to gently brush fabric, removing surface dirt.
Grease & Oil	Dawn® Dish Detergent	Apply small amount of detergent to clean, white, damp cloth and gently blot/rub area from outside of stain inward.
Food & Drink	Shout® Wipes	Gently blot/rub area with wipe from outside of stain inward.
Food & Drink	Tide® To Go Pen	Press tip of Tide® To Go Pen onto stain several times to release cleaning solution. Rub tip gently across stain to remove.

## CLEAR SEG CLEANING AND CARE

Moss Clear SEG surfaces are easily cleaned with soap and water. We recommend a simple two-step process:

- First, wipe with a towel and dish-soapy solution
- Complete cleaning by wiping clear with another water-moistened towel

Minimize dripping or streaking by fully wringing out excess liquid from towels, or use a spray bottle to either spot-spray the surface or towels.

Repeated gentle cleaning does not affect performance of unprinted Clear SEG; it may affect UV-printed instances over time. Never press or wipe any Clear SEG overly hard, so fit and integrity are maintained.

Clear SEG can be stored by loosely rolling or folding and storing in an appropriate size container or plastic bag. Hard creasing will embed into material memory. We recommend storing at general room temperature, ideally 65-70°F, as too far below or above will require acclimation to eliminate stiffness or over-pliability when handling for installation.

Clear SEG is UV-resistant, but do not store in direct sunlight.

Do not use the following to clean Clear SEG: power washing, Magic Eraser, degreasers, bleach, Goo Gone, gasoline, Formula 409 or other household cleaners.
