

# MOSS TEXTURED PANELS

# MOSS TEXTURED PANELS

At Moss we focus on providing strategic, creative solutions during any phase of a project – wherever and whenever you need us.

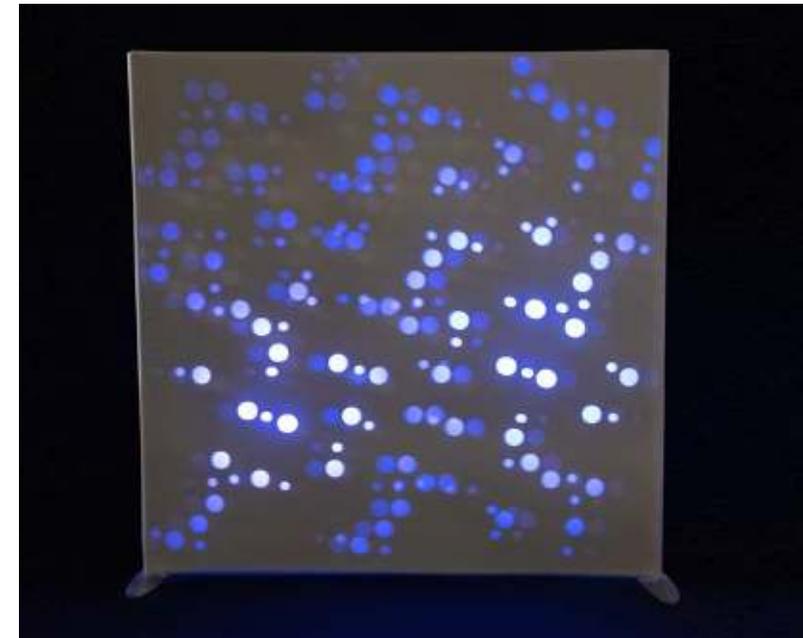

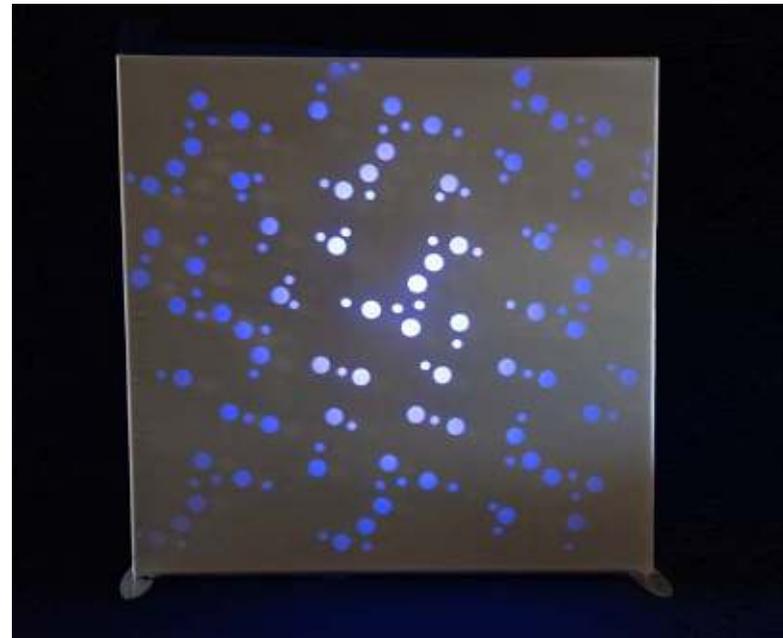

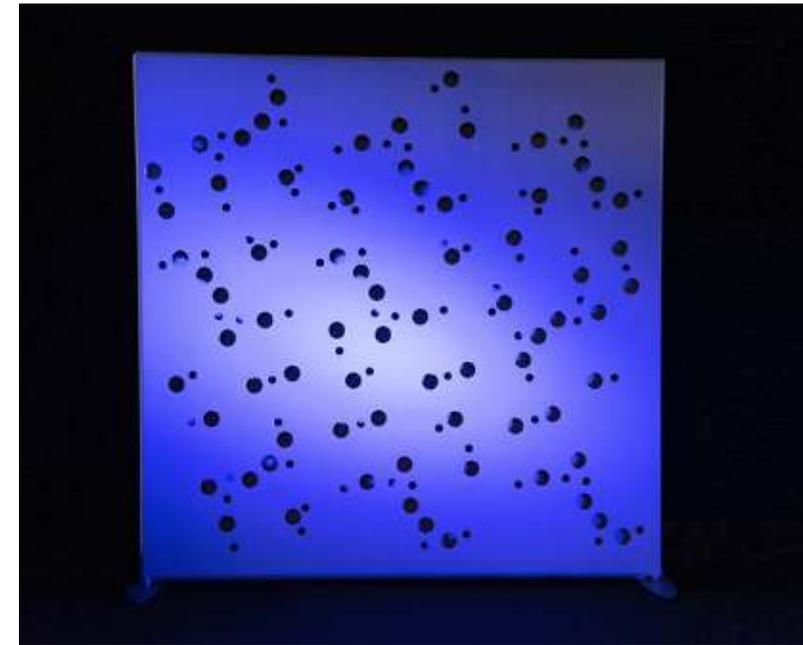

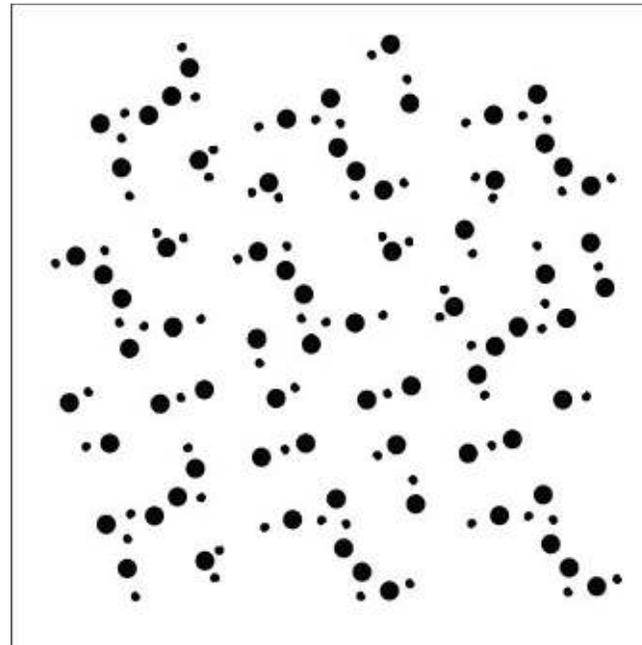

In this deck we provide an overview of our Textured Pattern Capabilities. This capability allows us to create large scale, textures that install incredibly fast. We use precision cutting and patterning to layer opaque and semi opaque materials that combine to become a stunning ceiling or event backdrop. When combined with printing, these panels create a dynamic branded installation. Chose one of these patterns or design your own!

# HOW IT WORKS

View product video here:
