

CURV-EDGE™

PATENT-PENDING SYSTEM

Create large custom 3D shapes with precise edges, curves and twists – to gain attention and hold it longer. Curv-Edge uses Moss Groove™ SEG tension fabric with Moss Classic™ 2" tube construction for flowing organic lines that bring sophisticated visions to life.

- | Individually change replaceable SEG graphic panels versus changing an entire fully-enclosed fabric skin
- | Unprecedented 3D structure fabrication
- | Combine with Construct, Groove and other Moss Systems to create endless shape opportunities
- | Produce structures with 4 or more sides – create pentagonal, hexagonal and other dramatic shapes
- | Moss-engineered extrusion is the ideal for flexibility, strength and durability
- | Minimum bend radius of 24"
- | Minimum fabric angle of 67°, maximum fabric angle of 270°

Custom curved
shapes with
squared edges.
