

CURVED ILLUMINEDGE™ 100MM LIGHTBOX

Horizontal or vertical curved lightboxes.

These single-sided lightboxes are made to order with visually striking custom curves. Horizontal curves feature either concave or convex backlit graphics. Vertical curves showcase unique symmetrical shapes or eye-catching asymmetrical flair.

- Vertical curve minimum bend radius: 24" convex, 84" concave.
- Vertical curve lightboxes can be designed with curves on all four sides.
- Horizontal curve minimum bend radius: 72" convex, 48" concave.
- Maximum 8' height for horizontally curved lightboxes.

- Illuminedge perimeter LEDs deliver high-quality, uniform bright light at 6,000° Kelvin.
- Options for self-standing, ceiling-hung or wall-mounted applications.
- Welded-corner construction.
- UL-approved internal power supply.
