

echoCon™

THE ART OF SOUND CONTROL

# Never has there been such a quick and easy way to create decorative acoustical treatments.

Our exclusive anodized aluminum extrusion framing systems and photo-realistic dye sublimation printed textiles open up a whole new world of design possibilities and install in up to 70% less time\* than traditional fabric systems. High performance fabrics combined with state of the art textile printing and over 35 years of manufacturing experience allow us to offer first in class quality products. In addition, echoCon has multiple manufacturing locations making it possible to manage very large projects in very quick lead times. Transform the look and feel of your space using—

echoCon™

THE ART OF SOUND CONTROL

\* Reduced installation time based on comparison to traditional fabric wall and ceiling systems.

# eC panels

Changeable graphics are easy to install, store and replace.

High end exposed framing—choose from anodized aluminum or deco-Edge wood-grains.

Custom and stock frame sizes available.

Use echoCon wall panels to add style to any space. Our exclusive framing is available in anodized aluminum for a clean and modern look, or you can choose from our decoEdge finishes which include a large selection of wood grain patterns. Sound management is more dynamic and

versatile than ever with powerful graphics that are both easy and economical to change. Wall panels are available in a variety of standard and custom sizes.

# eC walls

Custom style and superior sound management.

Epic impact with stock or custom graphics.

Installation in 70% less time than traditional fabric wall systems.

Get custom style of epic proportions and superior sound management performance with echoCon monolithic walls. This application is ideal for custom or stock graphics and will transform your walls in a flash—up to 70% less time than tra-

ditional fabric wall systems. Build-outs for light switches and electrical outlets are straight forward and easy to install.

# eC clouds

- Design the perfect coverage for your interior.
- Use graphics or solid colors to boldly define the ambiance of your space.
- Custom and stock frame sizes available.

Design the perfect coverage for your interior. Horizontally hanging clouds add major style to ceilings and look great as single statement pieces or when grouped in clusters. Use graphics or solid colors to boldly define the ambiance of your

space. Clouds are available in both standard and custom sizes and can be designed to any custom shape when using eC Sound Soft core.

# eC ceilings

- Easy access for ceiling maintenance with minimal down time.
- Create unique and distinctive sound management ceilings.
- No specialized crew required.

Bring art to new heights. echoCon offers sound management and graphics for unique and distinctive ceilings. In addition to easy installation and brilliant graphics, our system allows easy access for ceiling maintenance with minimal

down time and requires no specialized crew. Cut-outs for lights, sprinklers, and returns have a finished and clean look.

# eC baffles

— Manage sound while minimizing ceiling coverage.

— Use solid colors or graphics to create the perfect look and feel.

— Custom and stock frame sizes are available.

Vertically hanging sound baffles help manage sound while minimizing ceiling coverage—perfect for working around lights, sprinklers and returns. Use solid colors or graphics to create the perfect look and feel for your environment. Baf-

flles are available in both standard and custom sizes and can be designed to any custom shape when using eC Sound Soft core.

# eC freeform

— Custom design is our specialty.

— eC Sound Soft absorption core will work with any shape or size.

— The only limit is your imagination.

Get creative with freeform 3D shapes for sound treatment. Freeform freestanding elements often require little or no support from walls or ceilings. Custom design is our specialty and our exclusive eC Sound Soft core was developed to

turn any corner and fit any shape. The only limit is your imagination. Most products are available within a standard two week lead time.

# 3 points of difference

echoCon™

THE ART OF SOUND CONTROL

## **fabric solutions > artful interiors**

- Super vivid, extra sharp photo fabric graphics produce dramatic visual impact.
- 15 years of digital dye sublimation textile printing experience.
- We can use your artwork! Solid colors, stock patterns and images also available.
- Seamless graphics up to 10ft by 50ft. Paneled graphics allow limitless sizes.
- Compact fabric graphics are ideal for change-outs, shipping, and storage.
- eC Green Knit is made from recycled polyester for eco-friendly needs.
- Our durable fabrics are machine washable for easy cleaning.
- All fabrics are fire resistant and comply with ASTM E84 Class A rating.

## **unique framing > fast set-up**

- Installation in 70% less time minimizing site disruptions.
- Graphic and frame installation is effortless - no specialized training or tools required.
- All components are test fit at factory to assure 100% quality at the job site.
- All components arrive ready to install - no fabric finishing or frame cutting required.
- All components and box exteriors arrive labeled with customized set-up instructions.
- Choose from a large selection of decoEdge woodgrain frame finishes.
- Two week standard lead time for most custom jobs.

## **versatile system > diverse sound management**

- echoCon systems are compatible with absorptive, reflective, and diffusive cores.
- Choose from multiple aluminum framing options to meet all needs.
- Very large sizes and custom shapes possible. The only limit is your imagination.
- Our eC Sound Soft absorption core contributes to LEED credits.
- NRC values for eC Sound Soft absorption core up to 0.90.
- All fabric and frame technologies are compact and lightweight reducing shipping costs.
