1

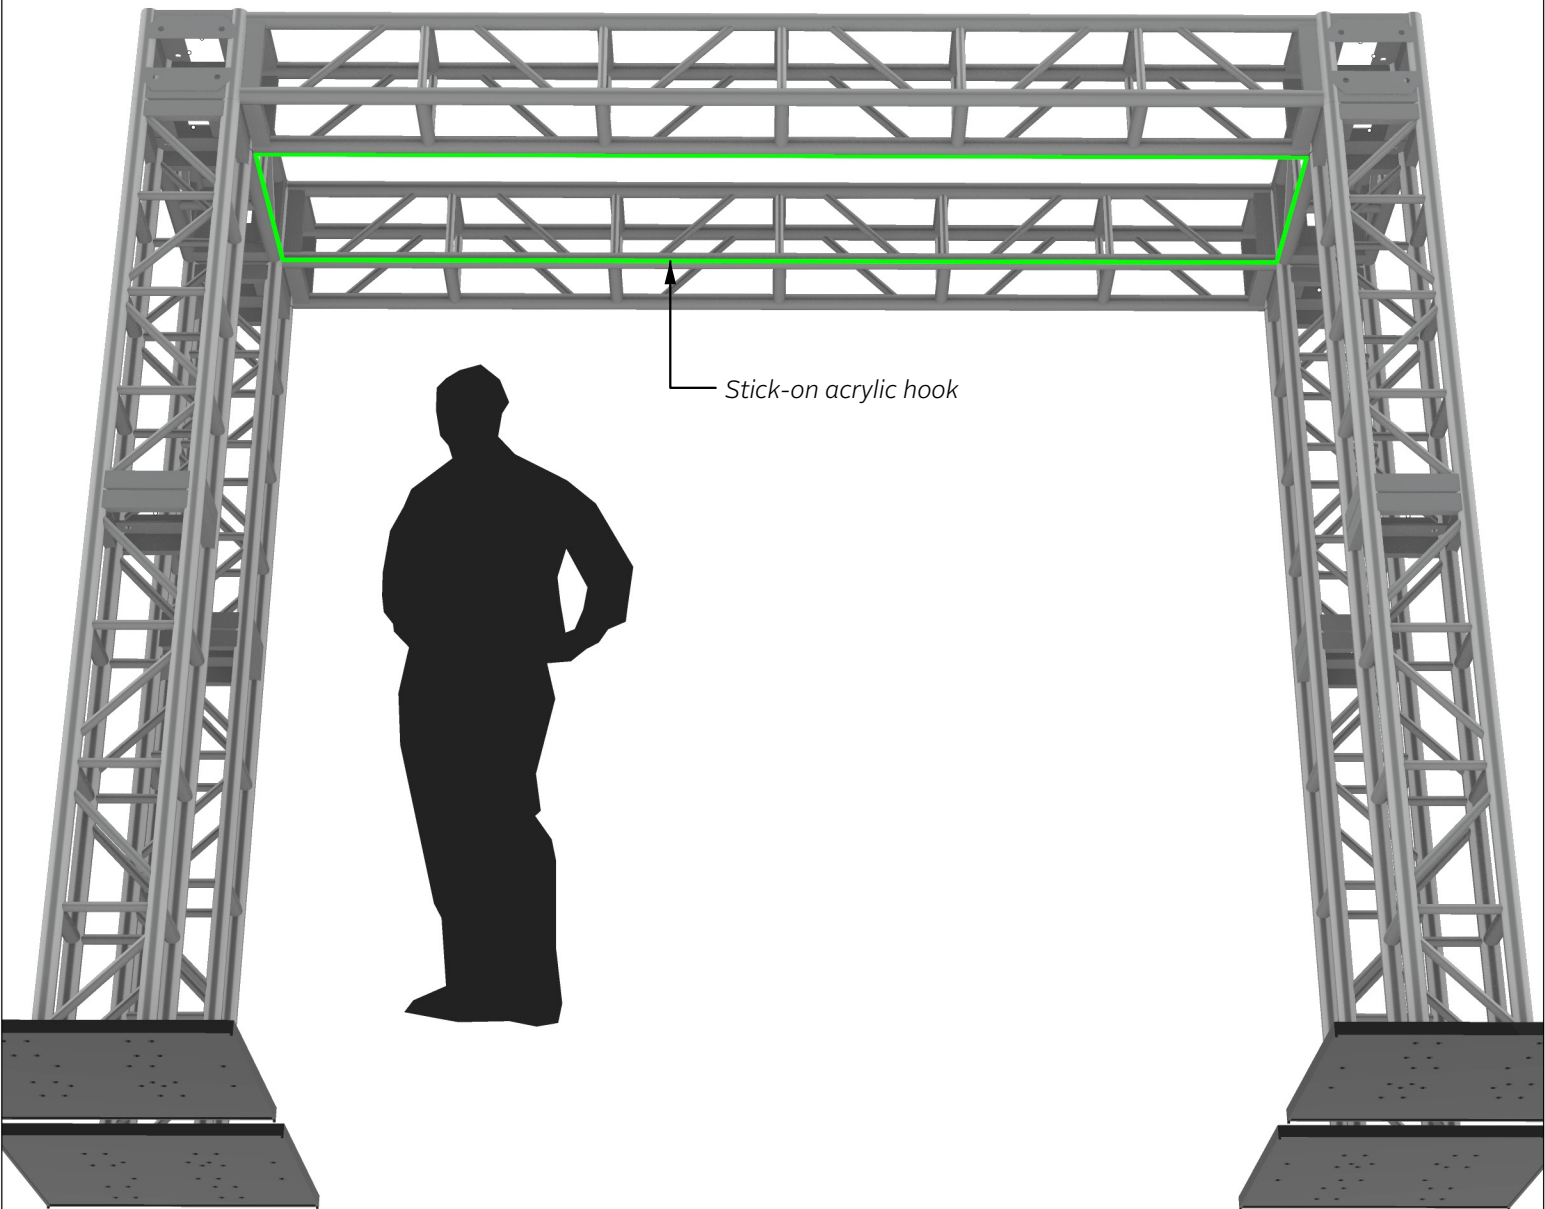

Assemble your desired truss structure to design spec and proper truss safety standards. Ballasting pictured below is representational only.

Perspective

2

Apply stick-on acrylic hook to the applicable surfaces of your truss structure. This will create a surface for your shoe-box truss banner to adhere to. Acrylic hook is denoted in green below.

3

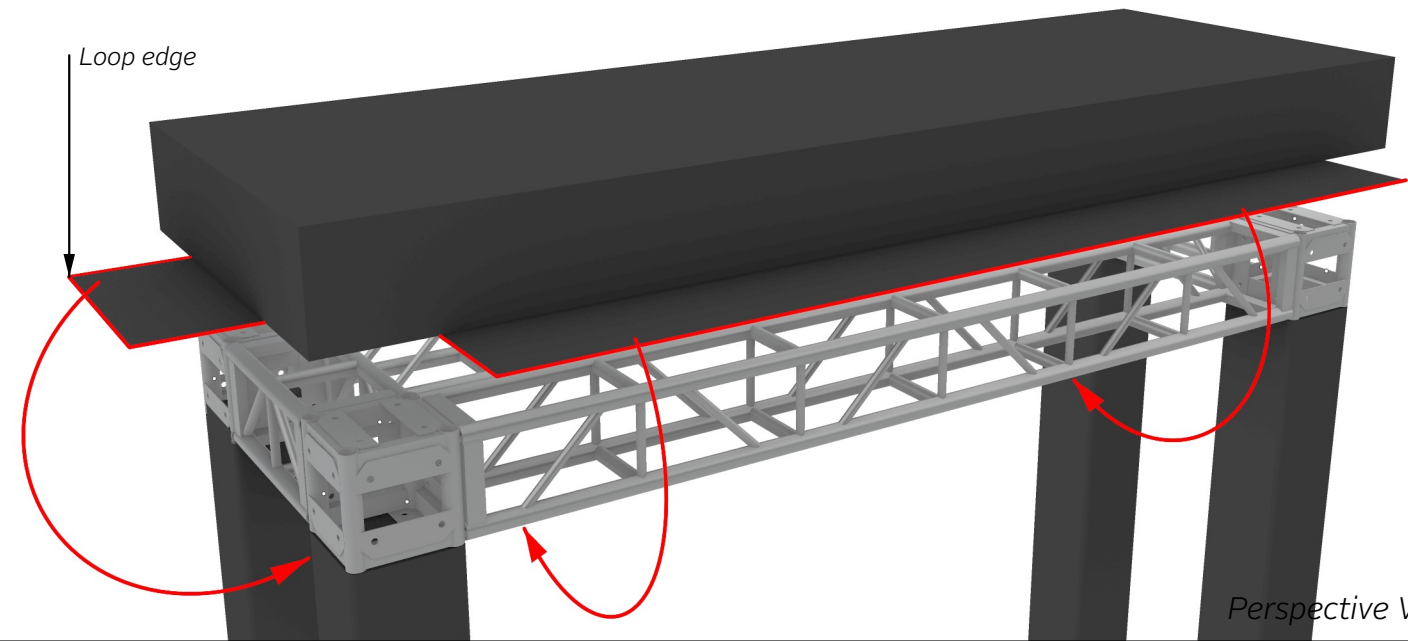

Apply the truss covers to the legs of the structure using the hook and loop enclosure.
When installing, orient the covers so the ring of extra HOOK is towards the top of the structure.
This will be used to attach the upper cover.

Perspective View

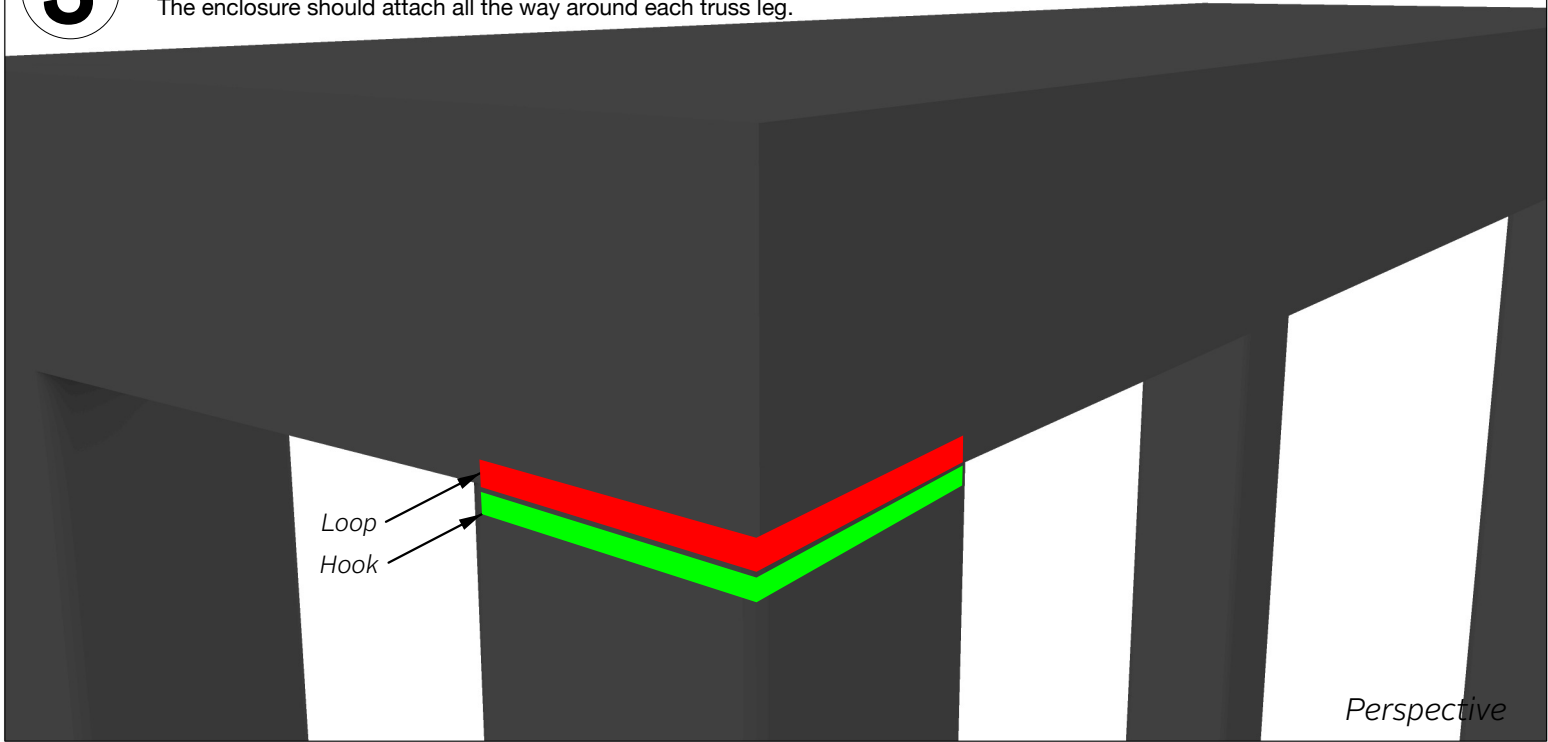

4

Apply the upper cover to the truss structure. Wrap the banner over the structure and attach the free faces to the inside acrylic loop from step 2 using the sewn-on loopedge.

5

Finally, attach the loop from the upper cover to the hook of the lower covers.
The enclosure should attach all the way around each truss leg.
